

I strongly feel that KLOVE radio serves me as a resident of my local community. I have heard MANY testimonies from other people that are positively affected in their lives by the encouragement and positivity that they receive from listening to KLOVE, as do I. If KLOVE were to be displaced by an LPFM broadcaster, so many of my friends and family would be adversely affected, as they would lose a very strong outlet for them to get the positive encouragement that we/they get from listening to KLOVE broadcasts. There are so many unsafe harbors so far as radio for our children, and this is one of our biggest concerns. KLOVE provides one of those rare safe harbors for listening to music, an important aspect of our culture. I believe it is in the public interest to have an option of listening to KLOVE, since there are not others available in many areas, including several that our family and friends have resided in many times. PLEASE do not override KLOVE's frequency with LPFM broadcasting. We have searched high and low over the years and finally found the one station we can count on, for our families in our communities.
